HOTEL BOUTIQUE
MÉRIDA

Our Hotel is a Historical gem

This hundred-year-old oasis in the Barrio de Santiago, the heart of the city, is located on the famous 59th Street, the first paved street in Merida and one of its main thoroughfares, which has received famous historical figures, such as former president and General Porfirio Diaz during his visit to the state in 1906.

Our Philosophy

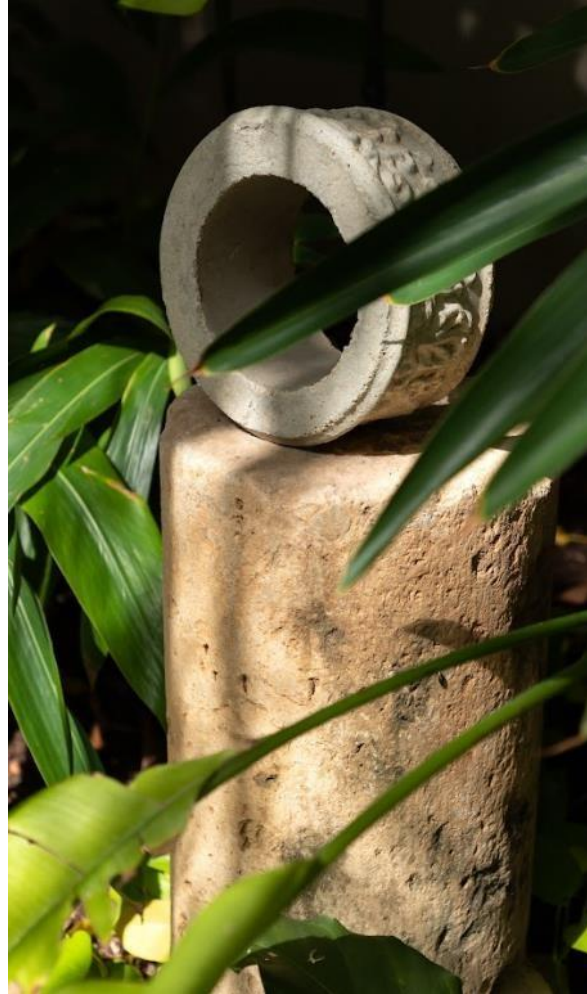

The flora and fauna around us inspire us; the generous and peaceful environment in which we find ourselves gives rise to our name, Künük, a palindrome that borrows two concepts from Yucatec Mayan: **Kuun - gold and Nuuk - big. Together, they form the phrase “big gold”,** which perfectly describes the privileged location in which we find ourselves, a jewel in the heart of the city and a true treasure to protect and nurture.

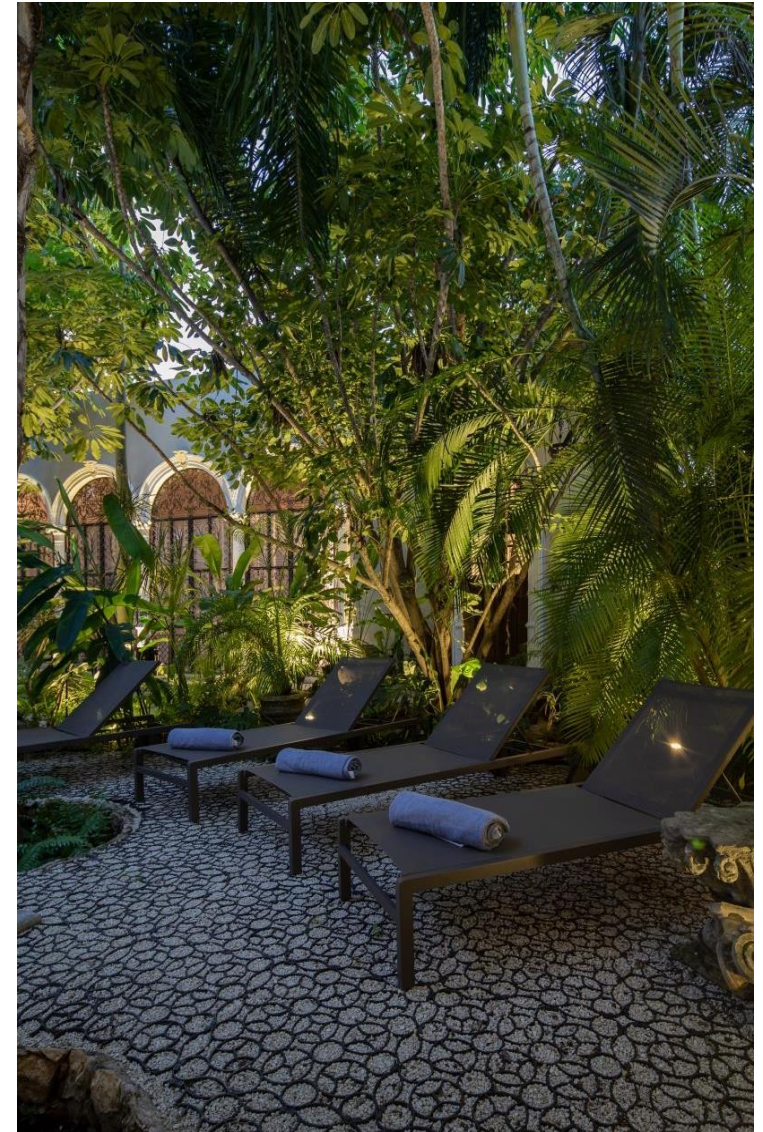

Our ecological Commitment

Helping the ecosystem around us is one of our greatest goals. Mérida is a destination with unimaginable value, not only because of its historical importance but also because of the vast flora and fauna found in it and the enormous cultural capital it houses within its population, its buildings, and its essence.

Künük is an architectural feat designed to contribute to the conservation of the environment – from the handmade floors, carefully crafted with absorbent materials that allow water to return to the water table, to the facilities, artistically arranged around a Huaya tree that serves as the main axis of the hotel and shelters it all with its shade.
